

FCC Commissioners  
The Federal Communications Commission RE: Docket 04-435  
445 12th Street, SW  
Washington, DC 20554

Dear FCC Commissioners ,

I am writing to voice my concerns about the FCC's proposal to relax the restrictions on the use of cell phones on airplanes in flight.

There is no hard evidence that cell phone use doesn't interfere with navigational instruments. The introduction of cell phone use in the cabin will not only increase tension among passengers, it will compromise flight attendants' ability to maintain order in an emergency. Cell phone use could also enable terrorists to coordinate a plan of action more effectively.

Please leave the current rules in effect.

and by the way, why after all these years of making people turn off their phones when on a plane should it now be safe to turn on the phone? so the whole story about interfering with radar etc. was a lie? of course it was. no one would have ever risked it. well , that being said , continue the current rules and do not allow cell phone use on planes. why make pretty miserable way to travel even worse. hey, strip searches, bad food, cramped quarters - what a stupid way to travel.

Sincerely,

jonathan doff
